Subject: SC7000 600dpi Driver Download **Issue #: 19438**

Product:	**Applies to:**
SC7000 attatched to GR3770	**Loading the 600x600 dpi driver**

[x] Software **[ ] Hardware** **[ ] Operation** **[ ] Other**

The downloading of the 600x600dpi Print Driver for the upgraded SC7000 is performed the same way as the 400dpi driver. If you are loading the driver onto a computer system that already has the SC7000 drivers loaded, you will get an error message during the download telling you that there is already a higher version loaded. If you see this error, you have to put the old driver Adobeps4.drv into a new folder and then download the 600dpi driver.

Follow this procedure for Windows 95:

1. Right button click on My Computer
2. Click on Explorer
3. Click on the + sign on the side of the C: drive
4. Find the Windows Folder and click on the + sign
5. Click on the System Folder
6. Look for the file named Adobeps4.drv

If you can't find this file, click on View on the Menu Bar and then select Options. Now select Show All Files. Sometimes this file is hidden.

7. When you see Adobeps4.drv, go to the Menu Bar and select New
8. Select Folder to create a new folder. You can name the folder anything you want.
9. Click on the Adobeps4.drv file and drag it into the new folder.
10. Close Explorer and download the new 600dpi driver.
